

Tattletale — OSINT Case Report

REPLAY MODE · 100% SYNTHETIC DATA · NO LIVE SCRAPE

Ana Rivera (@ana_rivera_dev)

Fictional software developer persona used to demonstrate the Tattletale replay pipeline.

Generated: 2026-06-08T14:58:27.564Z

Platforms covered: 3

100% synthetic data. This person does not exist. No real account was scraped.

Per-platform findings

INSTAGRAM · @ana_rivera_dev

Ana Rivera — Building tiny tools. Coffee, Python, and bad puns. she/her.

Followers: 4,821 Following: 612 Posts: 137

URL: https://instagram.com/ana_rivera_dev

- [2024-11-02T18:22:00Z] Shipped a CLI that renames 10k files in 200ms. Rust go brrr.
- [2024-10-19T09:05:00Z] Conference badge collection growing. PyCon was unreal this year.

X · @ana_rivera_dev

Ana Rivera — dev. I make small things that do one thing well. opinions are load-bearing.

Followers: 9,140 Following: 388 Posts: 2,204

URL: https://x.com/ana_rivera_dev

- [2024-11-04T14:11:00Z] Hot take: most retries are just fallbacks wearing a trench coat.
- [2024-10-28T20:47:00Z] Spent 3 hours on a bug. It was a missing await. It is always a missing await.

MASTODON · @ana_rivera

Ana Rivera — Federated and proud. Toots about compilers and gardening.

Followers: 1,320 Following: 540 Posts: 410

URL: https://hachyderm.io/@ana_rivera

- [2024-11-01T07:30:00Z] Migrated my blog to a static generator I wrote on a flight. 0 dependencies.

Cross-platform identity matches

@ana_rivera_dev [HIGH] !' instagram, x

Identical handle, matching display name and self-described developer bio.

@ana_rivera [MEDIUM] !' mastodon

Same display name and overlapping topics (compilers, tooling); handle shortened.

Chain of custody

Append-only SHA-256 hash chain. Each entry binds an artifact's content hash to the previous entry, so any tampering or reordering breaks the root hash below.
